

12 Way Ribbon Connector - Female

Acts as a junction for blown fibre connections. With male & female ribbon connections

Overview

The John Guest Blown Fibre 12 Way Ribbon Connector Female is designed to create a central hub for service distribution. For tool-free, intuitive installation and seamless performance under the toughest of conditions. The connector comes with the option of male, or female connections although both types can be easily connected to each other if required, creating a space saving installation.
