

Mounting Rail & Rail Pins

Fixes and secures underfloor heating pipework using a mounting rail

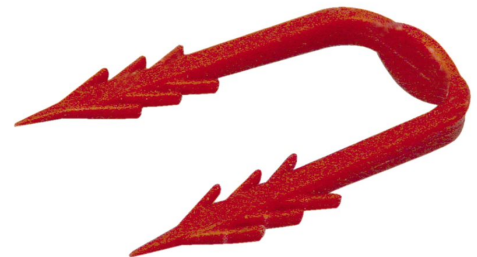

Overview

JG Underfloor Mounting Rail is designed for screed floor underfloor heating (UFH) applications when the insulation is too thin for staples. Suitable for new builds and extensions, especially ground floor levels, this pipe fixing method is fast and simple to install and offers high heat output and response.

15mm pipe can be easily secured to the clip rails on top of the rigid insulation sheets, which is then placed over the concrete subfloor. JG Underfloor Rail Pins should be used to fix the JG Underfloor Mounting Rail.

Features & benefits

- Screed pipe fixing system
- 2-metre mounting rail
- Easily clips pipe onto the rail
- Ready-made pipe spacing
- Rail is pre-scored at 100mm intervals for easy cutting
- Ideal for large regular shaped rooms
- Suitable for underfloor heating applications on 15mm pipe only

Product code	Description	Size	Pack QTY
JGUFHRAIL	JG Underfloor Mounting Rail	2m long	16
JGUFHPIN	JG Underfloor Rail Pins	40mm	100

Mounting Rail & Rail Pins

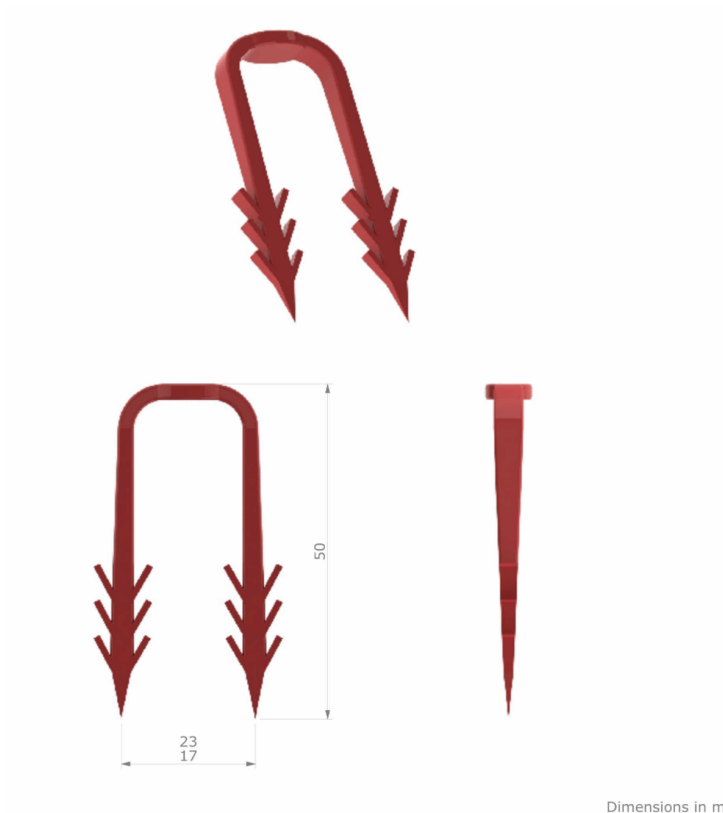

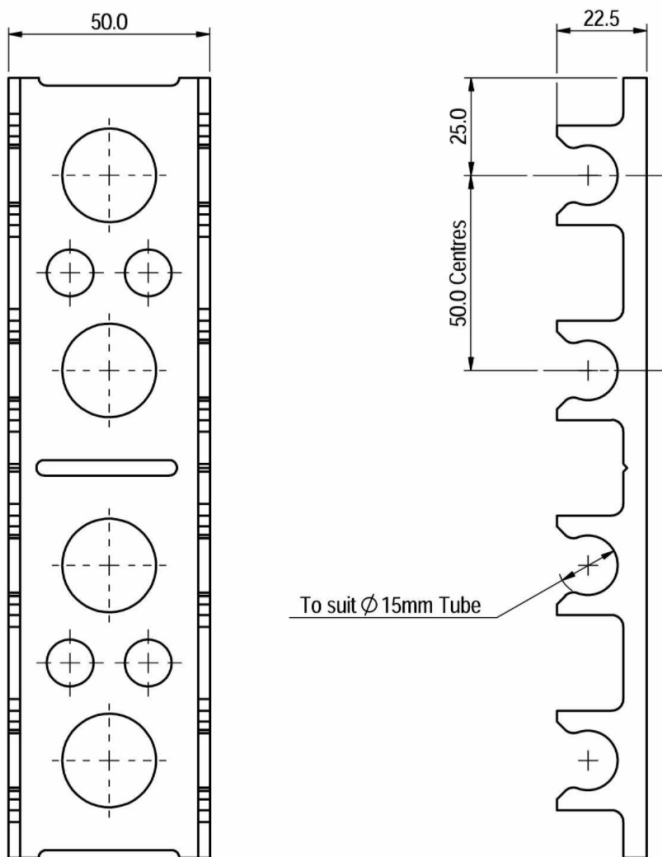

Materials

Rail	PVC-U, Black
Pins	Plastic, Red

Applications

Underfloor Heating
