

Brass Stem Adaptor (Metric Thread)

Allows for the connection of 2 John Guest fittings to create a swivel type connection

Overview

John Guest stem adaptor (metric thread) push-fit fitting adapts a push-fit connection to a swivel type connection. Fast and simple to install, John Guest Air and Pneumatics creates an instant connection and airtight seal without the need for tools, hot works or sealing agents. Air piping systems can be set up and installed 50% quicker than traditional methods.

The unique collet locking design firmly and securely holds the pipe in place without deforming the pipe or restricting flow. Fittings are also fully demountable, reducing system downtime during maintenance and making it quick and easy to modify or extend systems.

Designed in tough engineered plastic, fittings are compatible with John Guest nylon, powder coated aluminium or LLDPE tubing, as well as copper, PEXa and other soft metal pipe materials. All John Guest fittings are manufactured and assembled in the UK.

Features & Benefits

- Suitable for air or inert gases
- Superior flow characteristics

Product code	Description	Size	Bag QTY
RM0504M5	Metric Brass Stem Adaptor	4mm x M5	10

Brass Stem Adaptor (Metric Thread)

Working parameters & specifications

Application	Maximum working pressure, bar
Air	16 Bar

Materials
Body Brass

Dimensions – All measurements in mm unless otherwise stated
